

# The Lomond Press

VOL. 4 NO. 4

LOMOND, ALBERTA, FRIDAY, SEPT. 12, 1919

\$1.00 PER YEAR.

Drop it anywhere! Nobody cares! Anyway one little cigarette box, or the wrapper off chewing gum, —surely one would not think of littering the street. But if citizen young and old drops a paper on the street the cumulative effect will not be pleasant to behold.

A recent article seen is headed "How Wood can Help" makes us smile. On the prairie wood is certainly at a premium, and if the fates decree coal shortage I can plainly see where had better order another open winter.

The new Creen Prairie schoolhouse is now complete and a dance is being held there Thursday evening Sept. 18th. School will open shortly. As soon as a teacher can be secured.

## GUNS and Shells

The duck season affords plenty of sport, but the man behind the gun is not the only thing that counts. A true gun and good ammunition is a great factor. Buy them from—

**T. A. Kennedy**  
LOMOND

Mr. and Mrs. L. H. Phillips and Gladys and Lawrence, returned Saturday September 6th from Crrtwright Man. where spent their vacation. They were gone about five weeks.

The second race between J. R. McKay and R. L. King will be staged Sept. 20th. The date set will give plenty of time for other entries if anyone wishes to compete.

Hon. James McMaughton M. L. A. for this constituency was a Lomond visitor on Thursday for a short time.

While the sugar situation appears to be at a critical point and none or very little of the said article is available, it might interest them to know that peaches may be preserved with brown sugar. A good many have already purchased their fruit.

They must be washed thoroughly as the skins and pits are retained. The process is the same and well worth while and is preferred to the old by a great many people.

It seems that the sugar has been held up for no particular reason that we can see, and although the government is looking into the situation very little sugar is forthcoming as yet but the merchants are confidently expecting sugar next train.

Don't forget the G. W. V. A. dance Sept. 19 the boys need your help.

These fall rains are sure making the farmers smile and then some, from all reports the rain last night was general and lasted most of the night. Very few cared to venture out considering it was mail night. These rains are doing wonders for the hay situation and even if we do have a severe winter the stock will be in a fair condition to weather the storms with a little attention. And it is certain for they are surely faithful enough during the summer months as too many are prone to forget.

The G. W. V. A. are holding a dance in the I. O. O. F. hall Friday night for the benefit of the association. The boys are doing everything in their power to make the dance a success socially and it is up to the people financially, do your bit. They did theirs and did it with a good measure the least one can do is help.

## Municipal District of Clifton No. 127

### NOTES

The spirit of backbiting that is shown in most of the small towns and villages in both the old and new settled places is something deplorable to any well meaning citizen. How many times, I wonder, have we ran in a few minutes to pay a morning call to some of our friends and the first thing we heard was gossip, the talk of the town to be sure, but none the better for a o'that. But in the barber shops, the pool halls, any public place the same spirit is to be found. Someone telling some choice bit of gossip to the other fellow for fear he might not hear it. Cheer up, he will if he is around town any length of time. Why don't every citizen appoint himself a committee of one to stamp out this mania for it is a mania with a good many people, and appoint yourself your own deputy to enforce committee resolutions.

In a great many cases the beginning of this idle gossip is only some petty personal grudge. It seems rather a small way of getting even. If a per-

son has a grievance why not tell the offending party and perhaps things can be straightened out. If we indulge in gossip as a means of backbiting, when the story has gone it's course and finally reaches the offending party, it is so exaggerated the originator is puzzled to recognize it.

o o o

Why don't we have a regular "clean up" day and clean out our yards and see that our neighbor does too it would certainly add to the appearance of the town, and make the outsiders think we were still alive.

o o o

How does your dollar stand?

### NOTICE OF DISSOLUTION OF PARTNERSHIP.

To whom it may concern:—

Notice is hereby given that the co-partnership heretofore subsisting between the undersigned as Butchers, under the firm name "Haley & Henson" of Lomond, Alberta, has this day been dissolved by mutual consent. ## NO MORE BAD EGGS.

The people of the Province are probably not aware that there is in force an important act forbidding trade in bad eggs. This was passed at the last session of the Legislature and is now in force.

By this measure all people purchasing eggs from producers are obliged to separate the bad from the good eggs and they are forbidden to do business with the bad ones as soon as their condition is found out. This condition is arrived at by candling. The first handler, as he is called in the act, must candle the eggs purchased and reject those that are unfit for food.

This is an important protection which the consumer has not had up to the present time. The terms by which these eggs are described in the trade are mouldy eggs, black rots, spot rot, blood rings, mixed rots, addled eggs, etc. The producers are liable to punishment very greatly by this also as the reputation of the product will be immeasurably raised by the new law. It is estimated that not less than one sixth of the total annual egg crop is lost by the inclusion of bad and stale eggs in shipments. The conditions of these eggs is due to improper care in the first place. Some of the eggs have been kept in too hot a place, there has been neglect in gathering the eggs in a good many places, particularly in the country and the product has been held too long before being sent to market.

Most people have no appreciation of the importance of the egg and poultry output of Alberta. According to the last survey of the poultry industry

of the province the value of eggs alone amounted to 3 million dollars. It will be seen that if the portion usually lost is saved out of this output without taking account of any increase it will mean a substantial addition to the wealth of the producers and food consumers in the province. It is the aim of the Department of Agriculture to establish a standard in eggs such as has been established in butter and it is expected that the same result in a desirable export trade will be secured in the eggs as has been secured for butter. The enforcement of this act will begin vigorously at once.

The Department of Agriculture is appointing inspectors to the product in leading places and will have power to institute proceedings for the violation of the act. Violations of the act include a penalty of not exceeding \$100.

o o o

Politicians throughout Canada are betting themselves in action, and Dominion and provincial contests have brought to the foreground questions of leadership and organization. Ontario is agitating a provincial conservative convention and the other conservatives are again active. The trimming of sails also prevalent by all for a federal contest, and it looks as if Canada will have the largest number of parties in its history, lined up for the next election probably as follows, Unionist, Farmer, Soldier, Labor, Conservative, and Liberal.

Up to the present I have kept from commenting on politics even to women's suffrage but this article from a Manitoba seemed too good to keep.

o o o

## Men Wanting Hay
